

## THE FUN THEY HAD

### Introduction

- 1 This story is set in the future where the school system has been completely changed. There are no school buildings, books or human teachers.
- 2 Books and schools are different- they all are just a click away. You can find all sort of books and teachers, different syllabus and curriculum on your computer only. Your robotic teacher is always ready to take upgrading codes.

### Theme of the story

01

Technology and education.

02

The impact of technology on human interaction.

03

The importance of traditional education.

### Characters

01

Margie: A girl (eleven years old girl) who finds it amazing to have real schools and real books.

02

Tommy. A boy (thirteen years old) who finds an actual book. Elder than Margie and knows more than her.

### Flow of the story

Margie and Tommy talk about school.  
They find an old book.

They learn about traditional schools.

They are fascinated by the idea of a physical school

They express their desire to attend a physical school.

They find an actual book.

Margie finds it amazing.

Tommy tells her that his grandfather used to study in the actual school.

Margie is facing issues with her geography performance.

Her robotic teacher has few issues.

She is not happy to get back her repaired robotic teacher.

She has her school room just next to her bed room.

She imagines how great it would have been when all the students studied together and sat together in the old system of actual schools.

### Conclusion

The story ends on a sad note.

Margie and Tommy will never experience traditional schools.

The story highlights the importance of human interaction in education.
