SUMMARY

- ▶ Albert Einstein was born on 14th March in 1879, in the German city of Ulm.
- ▶ For about two and half years he could not speak. Young Albert had a special affinity towards mechanical toys.
- ▶ Considered boring, crazy and useful for nothing by everyone.
- ▶ At the age of 6, he learned to play the violin. He became a gifted violinist and maintained this quality all through his life.

- 
- ▶ Later on, for higher education, he joined the University at Zurich. He showed more interest in Physics and Mathematics.
 - ▶ One of the famous papers of 1905 was Einstein's Special Theory of Relativity, according to which time and distance are not absolute.
 - ▶ Married Mileva Maric, had 2 sons but unfortunately was divorced in 1919.
 - ▶ Albert Einstein went on to publish his General Theory of Relativity in the year 1915. His work was proclaimed as a revolution in the field of science. Einstein was honoured with the Nobel Prize for Physics in 1921.
 - ▶ In 1933, he emigrated to the USA as Nazis had got power.
 - ▶ In 1938, Germany discovered the principle of Nuclear Fission. On 2nd August 1939 Einstein warned the American President, Franklin D. Roosevelt through a letter, saying that even one atomic bomb was enough to destroy an entire part together with some of the surrounding territory.
 - ▶ In a secret project, the Americans developed the atomic bomb which they eventually dropped the bombs on the Japanese cities of Hiroshima and Nagasaki in August 1945.
 - ▶ Deeply shaken by the extent of the destruction, Einstein again he wrote a letter, this time to the United Nations in which he proposed the formation of a world government to prevent recurrence of such destruction.
 - ▶ During his last days, Einstein got involved in politics and used his popularity to campaign for peace and democracy. Einstein died in 1955 at the age of 76.
 - ▶ He was and is still celebrated as a visionary, a world citizen and definitely a scientific genius.
